

Bunge is a premier agribusiness solutions company with the talent and technology to advance the industry.

With our agile workforce, enhanced global footprint, increased access to key markets and diversified agriculture network covering all major crops, Bunge is able to navigate seasonal cycles, weather and other risks, better **connecting farmers to consumers to deliver essential food, feed and fuel** to the world.

## MAKING A DIFFERENCE

We are a community of people addressing some of the most pressing challenges facing the world today. We see these challenges – from food security to innovative renewable energy solutions – as opportunities to make a difference.

Through collaboration and value-adding partnerships, our teams are working to make us the most dynamic company in our industry. From farm to consumer, we manage production, distribution flows, quality and risk and provide transparency across fully integrated end-to-end value chains.

### BUNGE TODAY

Employs **~34,000 professionals** globally

Manages **~20 innovation centers** across the Americas, Europe, and Asia

Sources **230+MMT commodities and products** worldwide

Owens and operates **300+ storage facilities**

Protects robust supply chains through **40+ port terminals** and utilizes over **400 ocean going vessels** at any given time

Transforms oilseeds and grains through **155+ processing, refining and packaging facilities**

Operates in **50+ countries**

Our integrated, global operations involve purchasing, storing, transporting, processing, selling and distributing agricultural commodities and commodity products to customers around the world. We also provide financial, risk management and logistics services.

The commodities we source and market through our network are essential in today's world. From the grains and seeds that are part of the food supply chain, to the cotton that clothes us and the energy products that power cars and factories, what we do touches many parts of modern life.

## TRANSFORMING GLOBAL AGRICULTURE

We are reimagining the industry's ability to sustainably deliver value for all stakeholders.

### EMPLOYEES

Our expertise, culture of innovation, unparalleled portfolio of products and tech-forward solutions give us a competitive advantage to tackle the industry's most pressing challenges. We prioritize a culture of inclusion and belonging with possibilities for employees to grow and develop throughout their careers.

### FARMERS

Working with our wide network of farmers across the world, we provide enhanced supply chains and greater global market access, connecting farmers to consumers in smarter, faster and simpler ways.

### CUSTOMERS

We are customer driven. We work to meet evolving dietary needs and trends in every part of the world, and we provide ingredients and know-how to some of the world's most recognized food companies. Our expanded global portfolio supports more consistent supply and availability, enabling greater access to higher-value, more sustainable products for our customers.

### COMMUNITIES

We are building sustainable agricultural practices throughout our supply chains and supporting projects that safeguard the environment, respect human rights and improve the economic well-being of farmers, employees and local communities. We also support local social programs through financial and in-kind gifts as well as employee volunteer efforts.

## ELEVATING SUSTAINABLE SOLUTIONS

We are accelerating the development of low-carbon solutions across our global supply chains.

Tangible progress on climate requires taking bold action, embracing innovation and championing collaboration. That is why we are implementing solutions across our value chains to not only minimize our own environmental footprint but also help suppliers and customers on their decarbonization journeys.

Our approach has unlocked new growth opportunities, including becoming a key feedstock supplier for renewable fuels, working with farmers on regenerative agriculture practices and developing novel seeds and plant-based proteins all in an environmentally sustainable way.
